

cablecast™
CABLECAST PRO

Cablecast is a complete broadcast automation and scheduling system created and refined over the past ten years for PEG access and educational television channels. With Cablecast, you create your schedule once and it programs your channel, is automatically published to your web site, is automatically published to your bulletin board, is automatically exported to TV Guide's format, and your content is also made available to Tightropes VOD and live streaming servers.

DIGITAL SIGNAGE & BROADCAST
tightrope media systems

WHY USE THE CABLECAST PRO?

- :: Manage your schedule and facility from any location with an internet connection
- :: Completely automate playout, freeing staff for other high-value projects
- :: Very easy to use, "zero training" user interface
- :: Built to handle real world scheduling situations such as squeezing a program into a gap, rippling your schedule forward, saved searches, and making timing changes directly from the scheduling page
- :: Complete integration with Tightrope's internet VOD and live streaming servers (Optional)
- :: Generates the reports that most PEG facilities need
- :: Provides for many layers of user rights and permissions
- :: Facil import, media labels, RSS feed of your schedule, X-list, PODcasting, downstream keyer control, and all the other little things we think about so you won't have to!

KEY FEATURES

- :: Complete channel automation from a web based interface
- :: Controls video servers, DVDs, tape and live sources
- :: Includes Carousel framework, Tightrope's bulletin board (CG-250 not included)
- :: Complete programming library management with powerful search capabilities for all of your media
- :: True drag and drop user interface with advanced scheduling features such as rippling, block scheduling, series scheduling, saved searches, and much more
- :: Controls a wide variety of standards based video servers
- :: Built-in reporting engine
- :: Controls SX series video servers for added flexibility
