CAROUSEL ENTERPRISE SERVER

WEB ENABLED ENTERPRISE LEVEL
SIGNAGE SOLUTION

The Carousel Enterprise Server is an enterprise class turnkey solution for installations of hundreds to thousands of players and channels. Software only, Carousel Enterprise requires Windows 2003 Web Server Edition or higher, Microsoft SQL Server or MSDE 2003 or higher and appropriate hardware at each channel location. Carousel Enterprise can be programmed from any location with an internet connection, and includes a data integration feature for linking to business systems. It features the same ease of use and capability as Carousel Pro, but with greater economies of scale and affordability.

DIGITAL SIGNAGE & BROADCAST

CAROUSEL ENTERPRISE

A software solution for enterprise-level digital signage

WHY USE THE CAROUSEL DIGITAL SIGNAGE SYSTEM?

- :: The power and stability to handle very large networks
- :: "Zero training" user interface gets you going quickly
- :: Built in intelligence makes scheduling and administration easy
- :: Communicate instantly with your audience through emergency messaging
- :: Interface to event management systems means that when the information is changed in your event management database, it is automatically changed on Carousel's displays
- :: Reduces communications costs by eliminating traditional production, distribution and installation of signs and schedules

KEY FEATURES

- :: Web based user interface using Safari, Firefox or Internet Explorer
- :: Multi-zone display, high definition output for exciting, active content
- :: Emergency messaging capability, with multiple levels of authorization
- :: Remote data adapter for XML input from third party data systems
- :: Interfaces with popular event management systems such as Dean Evans and Resource25*
- :: Plays Flash, multiple video formats, RSS feeds* and image files
- :: Plays "Live" internet feeds full screen or in a window
- :: Displays "Live" TV signals full screen or in a window*
- :: Robust design for multi-channel/multi-building installations
- :: Ability to "tag" zones for grouping information
