CAROUSEL SERVER

WEB ENABLED DIGITAL SIGNAGE SYSTEM

Carousel brings a new level of capability, price, and ease of use to the digital signage market. The Carousel Server is a complete package of both hardware and software that can provide up to three separate channels of dynamic digital signage. Content can be uploaded, screens can be created, and Carousel can be programmed from any location with an internet connection.

DIGITAL SIGNAGE & BROADCAST

tigtrope media systems

WHY USE THE CAROUSEL SERVER?

- :: Manage all of your signs from a single location
- :: Includes one channel of display
- :: Add up to two more channels using optional Carousel players
- :: "Zero training" user interface gets you going quickly
- :: Built in intelligence makes scheduling easy
- :: You can use existing content from RSS feeds*, web cams, video, flash, and image
- :: Communicate instantly with your audience through emergency messaging
- :: Interface to event management systems means that when the information is changed in your event management database, it is automatically changed on Carousel's displays *
- :: Reduces communications costs by eliminating traditional production, distribution and installation of signs and schedules
- :: Delivers your messages to the right place, at the right time, to the right people

KEY FEATURES

- :: Web based user interface using Safari, Firefox or Internet Explorer
- :: Multi-zone display for exciting, active content
- :: Emergency messaging capability with multiple levels of authorization
- :: High definition output
- :: Plays Flash, multiple video formats, RSS feeds* and image files
- :: Comes with dozens of pre-defined templates, or you can create your own.
- :: Can import PowerPoint slides and presentations*
- :: Plays "Live" internet feeds full screen or in a window
- :: Built in intelligence for scheduling bulletins and feeds
- :: Interfaces with popular event management systems such as Dean Evans and Resource25*
- :: Displays "Live" TV signals full screen or in a window*
